STATE MACHINE STRIKE BACK

DONC ON VEUT STOCKER L'ÉTAT

```
interface Idle {
    type: "idle";
}
interface Moving {
    type: "moving";
}
type State = Idle | Moving

const idle : () => Idle = () => ({
    type: "idle"
});
const moving : () => Moving = () => ({
    type: "moving"
});
const initialState : State = idle();
```

STATE MACHINE STRIKE BACK

ET UNE FONCTION D'UPDATE = REDUCER
